

# MOTION DISPLAYS - ROTATING BLADE DISPLAY SYSTEMS

"E-Motion", the system that stops people in the street - Simple yet effective rotating blades system that can be suspended on cables or rods at any height between floor and ceiling. Header and footer panels can be added to create strong branding. Lighting from above or below can be simply be clipped on to enhance the impact of the display...

**Poster Blades** - Transform a standard large format poster A1 or A0 poster into a rotating unit. Just cut the poster into strips and slide into the pockets. Each display holds two posters - no tools required to change the display.

**Pocket Blades** - Individual acrylic pockets to take standard A4 (8.5"X11") paper. Standard units take 4 X A4 wide, with an option of 3 or 4 pockets high. All are double sided.

**Product Panels** - A highly attractive medium to display small items such as gifts, electrical accessories, jewelry, optical accessories etc. Creates a focal point in a large window. The small curved shelves are positioned on both sides of sandblasted acrylic panels, giving two displays in one area.
